

20 CENT SUPERFECTAS

This Season Running Aces has adjusted the minimum base bet on our Superfectas to 20 cents, as this will boost participation from additional off track outlets and create larger pools and bigger payouts. Here are some sample 20 cent superfecta wagers and ticket costs:

WAGER: Key 1 horse on Top over 3 horses for 2nd/3rd/ and 4th **COST:** \$1.20

EXAMPLE: "RUNNING ACES 20 CENT SUPER 1 OVER THE 2,3, AND 4"

EXAMPLE: "RUNNING ACES 20 CENT SUPER 1 WITH 2,3,4 WITH 2,3,4,5 WITH 2,3,4,5"

THE .50 CENT PENTAFECTA IS BACK FOR 2017

Running Aces proudly offers the "Hi-5" or Pentafecta wager again in 2017. This wager was extremely popular last season and produced some very large pools with an average .50 cent payoff of over \$900.00

*The .50 cent Hi-5 will once again be offered in the last 2 races every night

*This wager requires you to select the top 5 finishers in exact order in a single race

*Should there be no winners with the exact top 5 finish order, the entire pool will carry over to the next scheduled Hi-5 race

BOXING YOUT BETS

Bets on every possible winning combination for # of horses selected. Combines multiple straight bets. Horses can finish in any order.

EXAMPLE: Running Aces, Race 5, \$1 Exacta Box, 2-3 (Horses must finish 1st and 2nd. Two bets totaling a \$2 wager)

EXAMPLE: Running Aces, Race 5, \$1 Exacta Box, 2-3-4 (Horses must finish 1st and 2nd. Six bets totaling a \$6 wager)

EXAMPLE: Running Aces, Race 5, \$1 Trifecta Box, 2-3-4-5 (Horses must finish 1st, 2nd, & 3rd. Twenty four bets totaling a \$24 wager)

RUNNING ACES INTRODUCES THE NEW 20 CENT JACKPOT PICK 5 WAGER

- Pick the winner of 5 consecutive races to win
- Last 5 races every night
- Single unique winning ticket takes the entire pool for a "jackpot"
- Multiple winners share 50% of the net pool, and 50% is carried over in the "jackpot pool"
- Low take-out of only 20%

Play multiple horses in each race to greatly increase your chances of winning

EXAMPLE: "Running Aces 20 cent pick 5 ...1 with 2,3 with 4,5,6 with 7,8 with 1,2"

The cost for this example bet is \$4.80

Calculating pick bet ticket costs is fairly simple, just multiply the number of horses that you are playing in each leg (race) of the bet sequence, then multiply that number by the base bet amount (20 cents for the pick 5) from the example wager above, it's 1x2x3x2x2 which equals 24. Then 24 x 20 cents equals the ticket cost of \$4.80.

Remember, multiple winners will be paid every night, and the jackpot pool will build until there is a single unique ticket. After each jackpot is won the jackpot pool will start over on the next racing night. Good luck. You could be the next big jackpot winner!

Official order of finish and \$2 payoffs are posted on the tote board and the in-house television screens as soon as the race is made official.

The term "handle" refers to total amount of money bet and can be applied to the daily handle, weekly handle or annual handle.

Pari-mutuel wagering means "Among Ourselves". You win or lose money from other players. You do not play the racetrack as the "house". The track has no interest in which horses win. The track wants you to be a winner!
